OUR COMMITMENT TO SUSTAINABILITY

We at Venchi are committed to continually improving processes and the selection of materials and suppliers to ensure an increasingly transparent and sustainable supply chain and we are gradually changing all our packaging :

- FSC paper.
- All recyclable or compostable materials.
- Increasingly compostable or post-recycled plastic.

It is a constantly evolving transition because it depends on the availability of materials, the food law, the protection of product quality. We are committed to making progress every year to reduce virgin plastic consumption and abandon the use of glue laminated materials (not recyclable).

According to the European waste legislation all primary and secondary packagings already do carry printed information on their materials , but here is a quick guide of our bulk chocolate wrappings to help our customers.

NOUGATINE (pag. 79)
internal wrapping re-cycle in paper
external wrapping re-cycle in plastic

CUBA RHUM (pag. 82)
internal wrapping re-cycle in paper
external wrapping re-cycle in plastic
