# FACTSHEET

Have you enjoyed learning all about garden senses? Share these fun facts with your friends and family!

## **SEEING AND HEARING**

#### Fun facts about how we use our eyes and ears to see the world

#### Seeing

- > Our eyes see things upside down
- Your eyes will see around 24 million different images in your life

## Hearing

- > We can hear things in our sleep but our brain can ignore them!
- Our ears are made of many small parts to help us hear things
- Our gardens are never truly silent, if you listen very closely!

## SMELLING, TASTING, TOUCHING

Using our senses from our noses to our tongues to our fingertips

### Smelling

- > We can smell things more strongly in the summer months
- Using our senses from our noses to our tongues to our fingertips
- Smelling something can bring back memories more than any other sense

## Tasting

 People can have anywhere between 2,000 and 10,000 taste buds

something if we can't smell

> We can't properly taste

DID YOU KNOW?

Everything we taste is either sweet, bitter, sour, salty, cool or hot

\_\_\_\_\_

### Touching

 Our skin has tiny sensors to help us know if something is soft, rough, hot or cold
