

# FACTSHEET

Take a look at these fun facts, all about protecting our Earth and the wonders of wildflowers. Be sure to share what you've learnt with your friends and family!

## OUR AMAZING EARTH

Earth is a very cool place to call home, these are some of its amazing features that we all try to look after

### Plants and soil

Trees, plants, flowers and soil provide us with shelter and food, and even clean the air we breathe

### Landforms

Mountains, valleys and deserts are all important habitats for animals, they also help to keep the environment in balance

### Air

Air is the thing we breathe, so we need to make sure it is kept clean and healthy by stopping pollution

### Water

Oceans, rivers, lakes and ponds are all home to many different animals and underwater plants

### Animals

The Earth needs animals for many different reasons: they help plants grow, they give us food, and they make us happy!

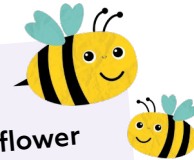

## CREATURES THAT LOVE WILDFLOWERS

There are lots of different animals and insects that rely on wildflowers for food and shelter - let's get to know them!

### Bees

Bees fly from flower to flower, gathering pollen so they can make yummy honey

### Butterflies

Butterflies land on flowers to drink a sweet drink called nectar

### Hedgehogs

Spikey little hedgehogs use wildflowers for shelter while munching on creepy crawlies!

### Frogs

Did you know that frogs like to live near wildflowers so they can find tasty insects to eat

### Ladybirds

These spotty critters like wildflowers because of teeny tiny bugs called aphids, they're also a safe space to shelter and rest
