## UN-BEE-LIEVABLE BEE FACTS

Here are a few facts about these fuzzy flying friends that you just won't bee-lieve...

### Buzzing bees

The buzzing noise a bee makes comes from its wings

**BZZZZZZZ**

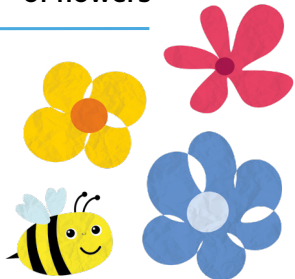

### Around the world

Bees are found on every continent except Antarctica

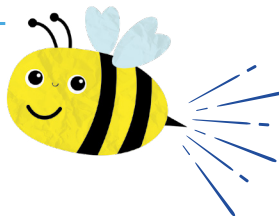

### Feeding on nectar

Bees have a long, straw-like tongue for sucking nectar out of flowers

### Stinging bees

Only female bees have stingers

### DID YOU KNOW?

There are over 25,000 different species of bees

## DO YOU KNOW YOUR BEES?

Let's discover some fun facts about different bee species...

### DID YOU KNOW?

Bees' wings move 200 times each second

### Bumblebees

Bumblebees have a plump, furry body and smelly feet! They use this smell to tell each other apart

### Honeybees

Honeybees have a slim body. They perform a 'waggle dance' to tell other bees where to find food

### Mason bees

Mason bees have a black head and dark orange abdomen. They are solitary and live alone

### Leafcutter bees

Leafcutter bees have a triangular shaped abdomen. Females cut leaves to construct their nest
