

Have you enjoyed learning all about brilliant bugs? Share these fun facts with your friends and family!

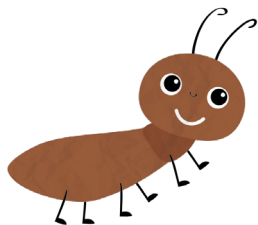

BUZZING BUGS

It turns out that bugs have their own special ways of communicating, **these are just a few!**

Boogie bees

Bees perform a special dance to show others where they have found food

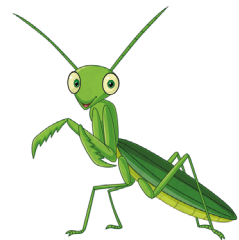

Sending signals

Ants communicate with each other by sending special chemical signals called pheromones

Bright lights

Fireflies can light themselves up and create a special glow to talk to each other

Make some noise

Crickets rub their wings or legs together to create loud noises that attract mates or signal danger

DID YOU KNOW?

The queen of an ant colony can live for up to 20 years

WEIRD AND WACKY

The world of bugs is full of surprises **and these wacky facts are no exception**

Bugs in space

Fruit flies were the first living creature to be sent into outer space

Before dinosaurs

Dragonflies have been around for 300 million years, that's even before dinosaurs came along

Eye spy

Caterpillars have twelve eyes!

DID YOU KNOW?
Butterflies can smell each other from 10 miles away

Bee quick

Bees wings can beat up to 11,400 times a minute

Heavy lifters

One dung beetle can drag up to 1,141 times its weight
