ST 21702 Milk replacer for puppies

Description:

Milk replacer for puppies. Complementary feed for dogs. To be used as replacement for breast milk for newborn puppies.

Direction for use:

100 ml Milk replacing: 20 g. powder (1 stoked measuring spoon = 6,5 g.) dissolved in 80 ml. chilled boiled water (about 45-50°). Mix carefully and chill to 37-38°. Keep the mixture refrigerated for up to 24 hours. Number of meals: 0-7 days every 2-3 hour; 8-14 days every 3-4 hour; 15-28 days every 4-6 hour. When the puppy is about 4 weeks old, change to Diafarm Puppy milk and solid meals. Durability after opening: 4 weeks.

Composition: Content per kg

Whole milk powder
Sucrose
Maltodextrin
Corn starch
Calcium carbonate
Triglycerides of fatty acid
Tricalcium phosphate

Additives:

Nutritional additives:		Analytical constituents:	
Vitamin A(RetinyI acetate)	32.000IU	Crude protein:	27%
Vitamin B1(Thiamin hydrochloride)	10mg	Crude fibre:	<1%
Vitamin B2(Riboflavin)	4mg	Crude fat:	22%
Vitamin B6	3,5mg	Crude ash	6,7%
Vitamin B12	95mcg	Sodium	4g
Calcium-D-Pantothanate	7,5mg	Phosphorus	8g
Vitamin D3(Cholecalciferol)	1600IU	Zinc	80mg
Vitamin E(DL-α-tochpheryl acetate)	85mg	Manganese	8mg
Vitamin K3(Menadione nicotinamide bisulphite)	1,0mg	Copper	12mg
Niacinamide	50mg	Iron	76mg
Folic acid	1,0mg	Iodine	1,6mg
Biotin	240mcg	Selenium	0,1mg
Vitamin C(Ascorbic acid)	52mg	Lysine	21g
Zinc oxide(3b603)		Methionin	6,5g
Manganese sulphate monohydrate(3B503)		Calcium	8g
Copper sulphate pentahydrate(3b405)		Magnesium	2,6g
Iron(II)fumarate(3b503)		Potassium	10g
Calcium iodate anhydrous(3b202)		Energy	3500kcal/kg
Seleniummethionine(CNCM I-3399)			14,65KJ/kg
